

GENESIS POINT — SANCTUARY CORE AGRICULTURE & CUISINE MASTER OVERVIEW (DEFINITIVE)

SCOPE:

- This document covers Sanctuary-Core Agricultural Slices 1–17
- These slices feed the sanctuaries themselves
- Diet is predominantly vegetarian
- Meat is rare, parcel-based, and treated as a specialty/status food
- Each slice contains EXACTLY 13 crops for variety and redundancy
- Harvest volume can be increased/decreased via nature maegi
- Space constraints are non-issues (20 x 3 mile slices)

NAMING RULE (CRITICAL):

- Each crop has:
 - 1) A fantasy-facing TRADE NAME (used in prose)
 - 2) A real-world REFERENCE NAME (in parentheses, author-only)
- Trade names are:
 - Grounded
 - Agricultural
 - Non-magical
 - Non-scientific
- Purpose: avoid modern English bleed while remaining instantly readable
- Reader should intuit the food without explanation
- Parenthetical names are a private author translation key

DESIGN PHILOSOPHY:

- Food language stays grounded
- Magic language is reserved for magic
- Cuisine should feel abundant, not restrictive
- Variety enables long-form storytelling (20+ books)
- Seasonal / merchant-specific exceptions can be introduced ad hoc without modifying the master list
