

MK147 — ARC 4 SEMESTER I

SOCIAL ENGINE RECONSTRUCTION

(Working Canon)

CORE REALIZATION

We do NOT need a giant cast.

We do NOT need a character for every class.

We do NOT need a social group for every domain.

We only need the recurring interaction engines that
naturally emerge from Kira's schedule.

Everything else emerges from traffic.

ACADEMIC INTERACTION ENGINE

CLASS 1 — CHEMISTRY

Purpose:

Civilizational worldview.

This is where the reader learns:

- How civilization understands nature

- Chemistry as the gateway into Quantum Field Theory
- Material organization
- Reactions
- Atomic and molecular thinking

Recurring Character:

Chemistry Character

Role:

- Discussion partner
- Lab interaction
- Note comparison
- Reader viewpoint into chemistry concepts

Narrative Function:

Worldbuilding through science.

CLASS 2 — GENESIS FIELD THEORY

Purpose:

Conceptual engine.

This is where the reader learns:

- Genesis Field
- Recursive inheritance
- Persistence

- Structure
- Organization
- Identity

Recurring Character:

Genesis Field Character

Role:

- Asks similar questions to Kira

OR

- Reacts to Kira's questions

Narrative Function:

Exploration of concepts.

This is where lectures get derailed.

CLASS 3 — DIFFERENTIAL GEOMETRY

Purpose:

Conflict engine.

Recurring Character:

Differential Geometry Rival

Role:

- Semester-long academic rival
- Strong formal mathematics background
- Excellent notation
- Excellent proofs
- Excellent memorization

Kira:

- Structural intuition
- Pattern recognition
- Terrible formalism

Result:

Both constantly challenge each other.

Professor:

"Please stop."

Narrative Function:

Academic tension.

SOCIAL ENGINE

HELKIR CLUB

Purpose:

Academic survival.

This is NOT relaxation.

This is shared suffering.

Recurring Character:

HELKIR Study Buddy

Role:

- Partner in misery
- Note comparison
- Study sessions
- Lunch discussions
- Reality check

Important:

Not necessarily in the same class sections.

Same pipeline.

Different schedules.

This allows:

"What did your professor say?"

"What did yours say?"

Relationship Type:

Co-survivor.

SUMMONER CLUB

Purpose:

Relaxation.

Pressure release.

Social life.

This is where Kira unwinds.

Nyx is the attraction.

Kira arrives attached to Nyx.

Role:

- Social recovery
- Campus friendships
- Club activities
- General chaos

Relationship Type:

Fun.

CAMPUS CULTURE ENGINE

NYX

Nyx is NOT a class.

Nyx is NOT a club.

Nyx is NOT a friend.

Nyx is an engine.

Functions:

- Generates social interactions
- Generates rumors
- Generates invitations
- Generates administrative headaches
- Generates mascot mythology

Kira gets into situations because Nyx exists.

Nyx is the catalyst.

ER FOAM BALL SEASON

Purpose:

Branch identity layer.

Weekly Saturday matches.

For a few hours every week:

- Summoners

- HELKIR

- Mages

- Architects

- Augmenters

remember they have rivalries.

The rest of the week:

Everyone goes back to being students.

Nyx eventually becomes:

Unofficial Summoner Mascot

Reason:

Three-game winning streak.

Students become superstitious.

Nobody can convince them otherwise.

TRAFFIC ENGINE

ARCHIVES FOOD COURT

Purpose:

Primary recurring traffic node.

Location:

Archives District

Reason:

Everybody eventually passes through the Archives.

Functions:

- Lunch scenes
- Study meetings
- Chance encounters
- Club interactions
- Alchemist appearances
- Nyx incidents

Kira's Favorite Restaurant:

Located here.

Reason:

The food is good.

Secondary Reason:

Kira cannot cook.

ABECA

Coffee analog.

Kira is addicted.

Functions:

- Study fuel
- Social collision point
- Thinking space
- Wandering destination

Many interactions occur here naturally.

COMPRESSED ARC 4 SEMESTER I ENGINE

Chemistry Character

Genesis Field Character

Differential Geometry Rival

HELKIR Study Buddy

Summoner Club

Nyx

ER Foam Ball Season

Archives Food Court

ABECA

FINAL OBSERVATION

This is enough.

We do not need twenty characters.

We do not need additional subsystems.

These interaction points emerge directly from:

- Kira's schedule
- Campus traffic
- Existing clubs
- Existing curriculum
- Existing culture

Everything else should emerge naturally from the
story engine.

STATUS:

WORKING CANON

SEMESTER I SOCIAL RECONSTRUCTION

READY FOR CHARACTER POPULATION
