
GENESIS POINT — ADVENTURING GUILDS & ELN CURRENCY

CANONICAL OVERVIEW / CHECKLIST

SECTION SCOPE

This section covers:

- Adventuring guilds as societal infrastructure
- ELN (E-L-N) currency system
- Genesis Stone backing model
- Genesis Dust economics
- Energy density rules
- Prime-based density progression
- Neon value interpretation
- Cross-links to crafting, alchemy, and vault systems

ADVENTURING GUILDS (DEFINED / LOCKED)

- Adventuring guilds function as semi-formal civic institutions
- Purpose: fill gaps where armies, civilians, or trade cannot operate
- Operate as mercenary, retrieval, harvesting, escort, investigation units
- Used by:
 - Kingdoms (bandits, monsters, sensitive operations)
 - Cities (security, infrastructure issues)
 - Scholars / doctors (rare materials)
 - Merchants (dangerous transport or recovery)

Guild Hall:

- Neutral ground for adventurers
- Hosts quest boards
- Handles contracts, arbitration, and reputation tracking
- Does NOT assign morality; only legitimacy

Quest Types:

- Security / bandit removal
- Civil aid (medical, agricultural, infrastructure)
- Exploration & recovery
- One-off rare events (century blooms, unique artifacts)

Adventurers:

- Paid primarily in ELN
- Reputation-gated access to higher-value contracts
- Failure is recorded
- High-tier contracts may pay Genesis Dust directly

ELN CURRENCY (DEFINED / LOCKED)

- Canon spelling: ELN (E-L-N)
- Paper-based currency
- NOT backed by gold or conjurable matter

- Used universally by kingdoms, guilds, and institutions

ELN Backing Model:

- Backed by Genesis Stones held in sovereign vaults
- Value based on total reserve energy density
- Paper currency abstracts value to prevent uncontrolled rupture

ELN Represents:

- Claim on latent Genesis potential
- Access to civilization (trade, law, guilds)
- Delayed irreversible energy collapse

GENESIS STONES — GENERAL RULES (DEFINED / LOCKED)

- All Genesis Stones:
 - Identical physical size
 - Cannot be resized, duplicated, or inflated
 - Exist in discrete color-locked density states
- Colors that naturally form:
 - Red
 - Orange
 - Yellow
 - Green
 - Blue
 - Violet
- White Genesis Stones:
 - Crafted, not harvested
 - Not part of public currency reserves
- Clear Genesis Stones:
 - Special category
 - Not fully defined yet

GENESIS DUST (DEFINED / LOCKED)

- Any Genesis Stone, when ruptured, collapses into:
 - The SAME quantity of dust
- Difference between stones is NOT dust amount
- Difference is ENERGY DENSITY of the dust

Dust Properties:

- Consumable
- Non-reversible
- Cannot be directly conjured
- Used by:
 - Alchemists
 - Blacksmiths
 - Artificers
- Dust imbues materials with properties tied to its color/density

Dust is:

- The “hard currency” substrate beneath ELN
- The real cost of magic, crafting, and war

ENERGY DENSITY SYSTEM (PRIME-BASED) — LOCKED

- Energy density is quantized and discrete
- No continuous density spectrum exists in nature
- Arbitrary densities (e.g., 0.1378, 0.7894) do NOT form naturally

Density Progression Rule:

- Each color's density is a PRIME multiple of the PREVIOUS color
- NOT based directly on Red

Canonical Prime Ladder:

- Red : 1×
- Orange : 3× Red
- Yellow : 5× Orange = 15× Red
- Green : 7× Yellow = 105× Red
- Blue : 11× Green = 1,155× Red
- Violet : 13× Blue = 15,015× Red

Consequences:

- Value accelerates multiplicatively
- Higher colors are astronomically more valuable
- Composite or non-prime densities are unstable

NEON VALUES (DEFINED / LOCKED)

- Neon values (e.g., 0.1378) are NOT density states
- They are diagnostic readouts of:
 - Environmental interaction
 - Stress
 - Mana pressure
 - Observer proximity
- Neon values vary between stones of the same color
- Neon values do NOT affect dust class or ELN value

VAULTS & ECONOMICS (DEFINED / LOCKED)

- Kingdoms maintain Genesis Stone vaults
- Vaults track:
 - Total energy density
 - Color-weighted reserves
- Stones are NOT counted by number, but by density equivalence
- Unauthorized rupture = economic sabotage / treason

Economic Truth:

- Magic consumes value
- It never creates net value
- ELN exists to delay irreversible collapse of reserves

CROSS-REFERENCED CANON (FROM OTHER THREADS)

-
- Days, months, years renamed to Genesis Point-specific calendar
 - Professions codex:
 - Alchemists use Genesis Dust
 - Blacksmiths embed dust into steel
 - Artificers combine multi-density components
 - Adventuring guilds interface with:
 - Crafting guilds
 - Alchemy houses
 - Enchanting institutions

OPEN / TODO (NOT YET DEFINED)

- Exact Genesis Stone harvesting mechanics
- Conditions required for higher-color formation
- Clear Genesis Stone full behavior
- White Genesis Stone collapse mechanics
- Dust purity classes
- Legal rupture thresholds
- Black-market dust syndicates
- ELN denomination structure
- Regional ELN acceptance variance
- Vault auditing rituals / systems

STATUS

This section is:

- Internally consistent
 - Canon-compatible
 - Ready for PDF export
 - Safe to append to master Genesis Point checklist
-
-
